

Season 4 WHO CAN YOU TRUST?

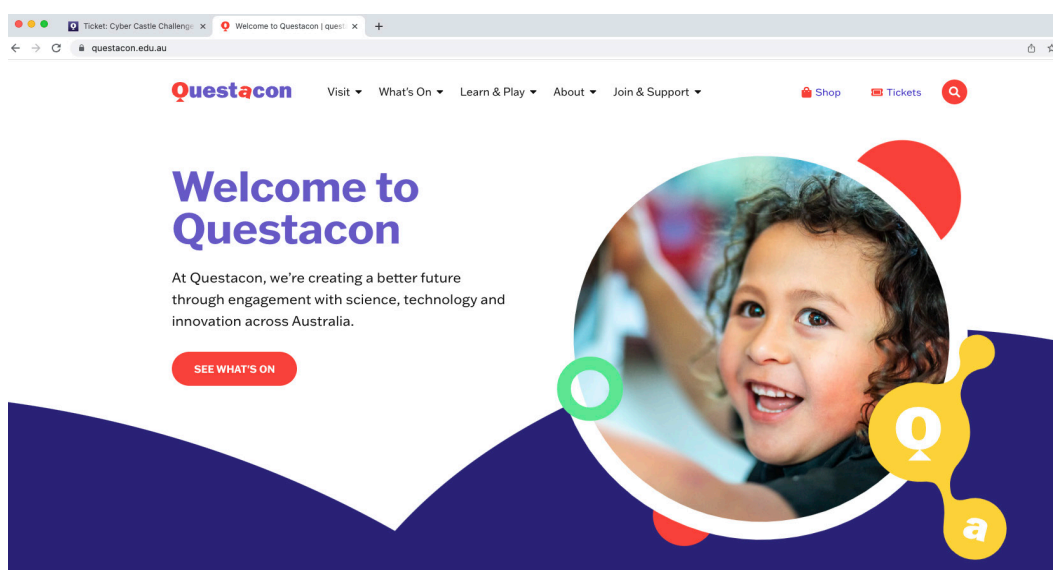

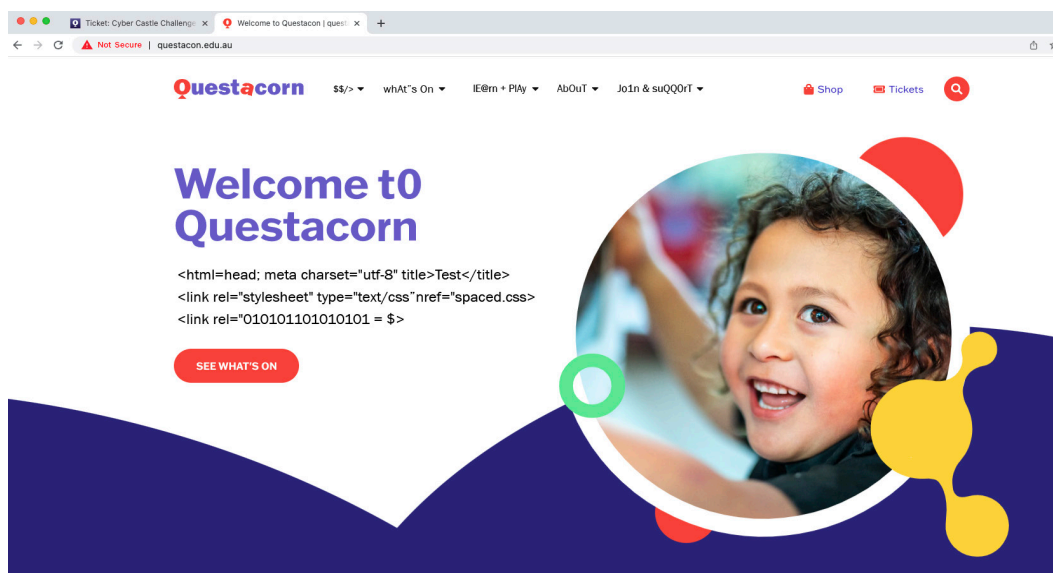

NAME :

CLASS :

Activity 1 - Let's go phishing!

Phishing is where scammers pretend to be a trusted website, email sender, or company to trick you into giving your personal information. Can you distinguish what's real or not online?

a) Look at the two websites below. Can you spot any differences?

Season 4 - Who can you trust? BEFORE GAMEPLAY

b) Which of these websites do you think is the fake?
Explain your choice.

c) Have you ever heard of a phishing campaign in real-life?
What happened? How would you stop it happening again?

Activity 2 - What does a cyber security expert look like: Part 2

Cyber security experts help us stay safe online, but a lot of cyber security practices rely on you! What do you think a cyber security professional looks like?

a) Draw a cyber security expert

Name your expert:

Season 4 - Who can you trust? BEFORE GAMEPLAY

b) Compare your cyber security expert to the one you drew in season 1. Are they different? How?

c) Why do you think cyber security is an important career of the future?

Activity 3 - Can you teach cyber security?

After four seasons of gameplay, you have learned a lot about cyber security. But cyber security is the responsibility of everyone. Use your new knowledge to create a way to teach others about cyber security.

a) List one cyber security concept you learned from each season of the game.

Season 1

Season 2

Season 3

Season 4

b) Using what you’ve learned during the Cyber Castle Challenge, create a way to teach others about cyber security. This might be a cartoon, short story, poster, video, or dance. Be creative and share your creation with the class.
