

Questacon Environmental Management Policy

Our Organisation

Questacon's vision is for a better future for all Australians through engagement with science, technology and innovation.

As a role model for the Australian Government to the wider community, Questacon recognises its responsibility to minimise the impact of its activities on the environment.

Our Commitment

Questacon's Environmental Management Policy covers all activities carried out by Questacon in the ACT.

This includes all education, transport, manufacturing and office based activities at our main premises in Parkes and Deakin.

Questacon is committed to continually reducing its impact on the environment in proportion to the scale of its activities.

Our Strategy

Questacon is committed to:

- Continuing to improve our Environmental Management System (EMS) by minimising pollution, and reducing our carbon footprint where possible, as well as maximising opportunities in recycling and waste reduction. We also wish to encourage staff and visitors to embrace improved practises which minimise the impact on the environment.
- Working closely with all of our stakeholders to continually monitor and refine our work practises and activities to ensure best practice and environmental agendas are given the highest priority.
- Complying with all relevant Commonwealth and ACT environment legislation, with the Commonwealth Government's environmental policies and initiatives, and with any other environmental initiatives which Questacon voluntarily commits.
