

EXCITE@Q

QUESTACON'S EXCITE@Q EXHIBITION PROVIDES VISITORS WITH A HANDS-ON EXPERIENCE THAT BENDS BOTH MIND AND MUSCLE.

Enter the exhibition through the Rototron - a tunnel of bright, moving lights. Try keeping your balance as conflicting sensory messages in your body and brain make you dizzy.

Send neon-coloured scarves flying up to the ceiling through a tangled network of tubes and try to predict where they will come out. Can you catch them as they float gently down?

Continue the fun on the popular Free Fall slide. Drop yourself into a six-metre freefall down a vertical slide, experiencing weightlessness for a moment before sliding out on the gently curved base. Will you have the courage to let yourself go?

Challenge your friends to Cross Hockey, where up to four players can create their own air hockey game, or test your skills against a robotic arm in a game of air hockey.

If air hockey is not your style try a game of Batak, which tests your reaction times and peripheral vision. This game is used to train racing car drivers to improve their reaction speed. How fast can you react?

Excite@Q is suitable for all ages and has links to the Australian Curriculum: Science.

Excite@Q is a high-impact, high-energy and highly-addictive experience designed and built by Questacon and is located in Gallery 7.
